Developer Environment

+++++ **Sublime Text** +++++

Command-shift-P for package control installations

My Current ST3 Packages:

+++++ **Terminal** +++++

nano ~/.bash_profile << to edit bash profile
Ctrl-x, Y, enter << to save changes

source ~/.bash_profile << update terminal to bash profile

My Current Bash Profile:

```
GNU nano 2.0.6      File: /Users/xxxx/.bash_profile

export PS1="\w:\$(git branch 2>/dev/null | grep '^*' | colrm 1
2)\$ "

# Setting PATH for Python 3.7
# The original version is saved in .bash_profile.pysave
PATH="/Library/Frameworks/Python.framework/Versions/3.7/bin:$
{PATH}"
export PATH
```
